### SEVERAL CASES OF HOG CHOLERA HERE

County Agent F. M. Seidell reports that several cases of hog cholera have been reported to him, as a result of hogs being shipped in from infected districts. Cholera has been reported on the farms of Neils Peterson, D. E. Watson, John Mabon, Mike Collins, Fred Bergfeld, O. Bowser and Ira Roland. The most of the herds on these places have been vaccinated since being infected. It is up to the people of the county to exercise care that this disease is stamped out and not allowed to spread. Hogs from other areas should be quarantined for two weeks and dipped before being put with the native hogs. The first indication of hog cholera is getting off feed, high

temperature, arched back and sunken sides. A post mortem shows kidneys spotted resembling turkey eggs. Dogs should be kept at home.

Anyone visiting infected places should be careful to disinfect the shoes, etc., before returning to their homes. If cholera breaks out call your neighbors, giving them warning and if possible secure a veterinarian at once.

Leavitt and who was charged with the stealing of a quantity of grain from a car on Girard siding, said grain alleged to belong to Leavitt, had his hearing in county court this afternoon. He was acquitted because of lack of enough direct evidence to convict. The alleged theft is said to have occurred in August, Chandler having sold some grain to a grain buyer at about that time.
